

AI PHARMA INNOVATION

July 25 – 27, 2017 Boston, MA
www.ai-pharma.com

An Open Letter from AI Pharma Innovation Chair

Ranga Sarangarajan, Ph.D
Senior Vice President & Chief Scientific Officer

Dear colleagues,

In our fast-paced, ever-changing world, technology is disrupting the traditional research and development paradigm. More specifically, artificial intelligence is at the cutting edge of this disruption.

As a scientific leader embedded in an AI-centric company, I have witnessed first-hand the power of artificial intelligence to revolutionize the discovery and development of therapeutics. Throughout scientific history we have seen many technologies proclaimed as “disruptive” fade into the background of scientific process. However, AI is different. AI promises a genuine shot at de-risking development, expediting timelines and ultimately leading to the creation of better medicines with better outcomes.

The AI wave of disruption is not without challenges; scientific, behavioral, operational and regulatory mindset shifts are required to ensure successful implementation and large-scale adoption and application of AI algorithms within the drug development industry.

Now is the perfect opportunity to immerse yourself in all that is new with regards to the real world application and successes of AI in R&D. As Chairman, I invite you to the inaugural AI Pharma Innovation Summit to join a truly diverse group of professionals, from biopharmaceutical, technology and academic institutions.

The diversity of focus areas covered in the meeting provides an opportunity to be part of the AI mindset shift. From case studies to roundtables, to presentation dialogs, panel discussions and interactive workshops, there is much to learn from each other!

Kind regards,
Ranga Sarangarajan
Senior Vice President & CSO, BERG
Chairman – AI Pharma Innovation 2017
